

Get Started using Boulevard Step-by-Step

Thank you for choosing Boulevard online for your business needs! We suggest starting with the following steps and exploring the **Getting Started** section in our online help center. You'll find many articles there, including brief videos to assist you in familiarizing yourself with the new software.

Access support articles in Boulevard through the Help widget located

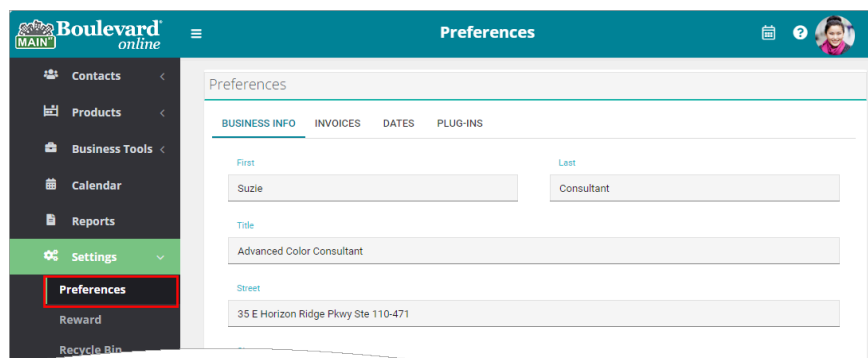

in the application's lower-left corner by clicking  to search, or view them in full-size on a separate browser tab by clicking  from the top navigation bar.

To access your newly created account, click the provided link, or type **blvd.online** into your web browser's address bar. For any inquiries, explore the **Popular Topics**, **send us a message**, or **connect with us via chat**.

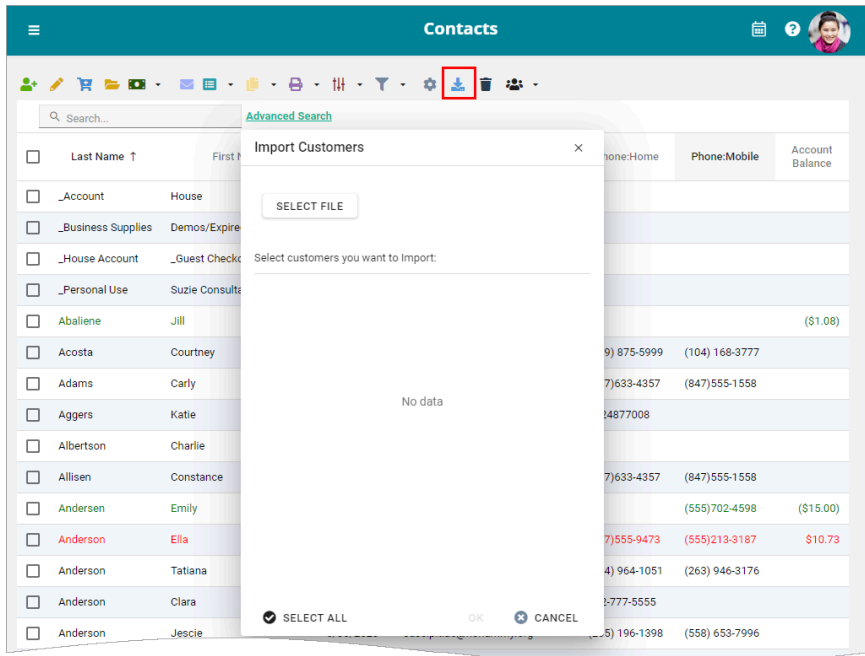

Step 1: Preferences & Settings

In Boulevard, the Preferences section is designed for you to enter your personal details and customize the software to fit your business needs. For comprehensive details on the available options, settings, and fields, refer to the **Customizing Boulevard** section.

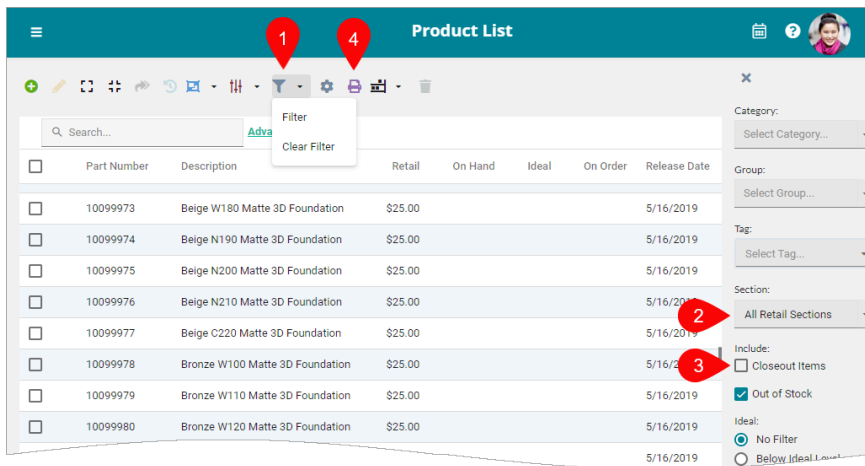

Step 2: Adding Contacts

Contacts can be **imported from a file**, and **new contact profiles can be created** individually as needed.

Step 3: Entering Your Current On-Hand Inventory

You can **print an inventory worksheet**, **conduct a physical count** of your on-hand inventory, and record it in Boulevard using one of the methods below. Alternatively, you can **import product orders** from the company website for up to two years.

To integrate your existing base inventory instead of importing past product orders, it's recommended that you view the tutorial videos for both methods before deciding on the most appropriate one. Consult the **Entering Your Base Inventory** article for detailed instructions.

Entering Your Base Inventory (Option 1)

Option 1 will guide you through adding the amounts directly to the On Hand field of the product list.

Product List

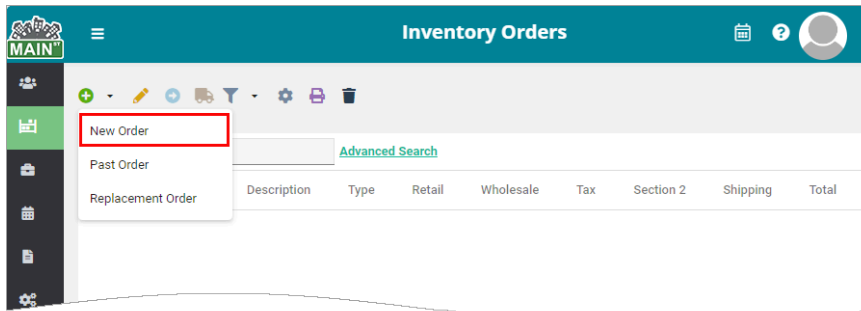

Search... [Advanced Search](#)

Part Number	Description	Retail	On Hand	Ideal	On Order	Release Date	Closeout Date
10173101	3D 4-in-1 Cleanser (Normal/Dry)	\$26.00	5			11/16/2020	
		\$26.00	4			5/16/2018	
		\$24.00					
		\$27.00	-2			11/16/2020	
		\$34.00	4			11/16/2020	
		\$34.00	4			11/16/2020	

Use your tab or arrow keys to move quickly between fields to change amounts in the **On Hand** or **Ideal** fields

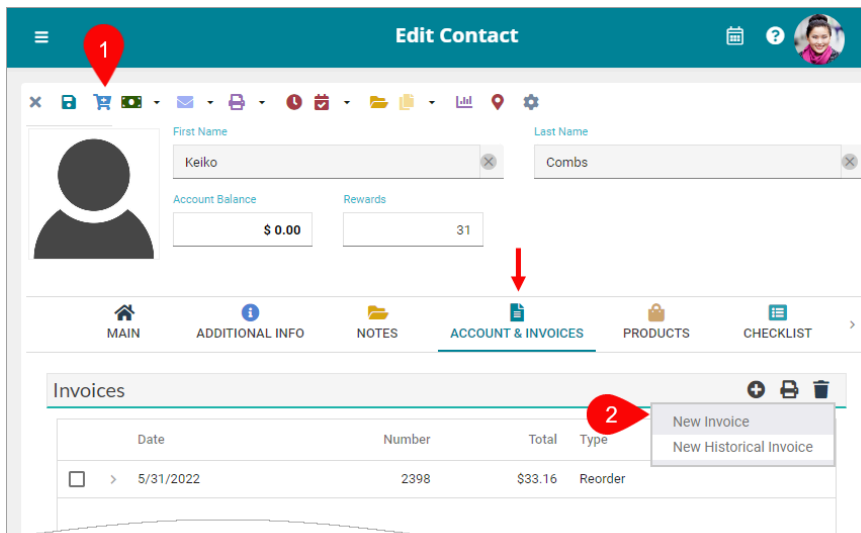

Entering Your Base Inventory (Option 2)

Option 2 will guide you through creating a Base Inventory Order that you receive into your inventory, which will then update the On Hand amounts in your product list.

Step 4: Creating Customer Invoices & Posting Payments

Customer purchases may be recorded by **creating a new invoice**, which reduces inventory levels, or by **creating historical invoices** that do not impact inventory. The image demonstrates two ways to create a new invoice within the contact profile; alternatively, you can start a new invoice from the **contact list toolbar**.

Payments made at the time of the initial purchase may be included on the invoice. Alternatively, if the payment is made on a later date, it can be applied to their account via the contact list or contact profile toolbars, as illustrated below. For additional details, refer to the **Posting Payments** article. If you use ProPay for payment processing, you can email a **Direct Payment Link**.
